Monthly report

Performance analysis

01/09/2026 **Sep 2026** 30/09/2026

dashed line: the comparison period

SOURCES

- Meta Ads
- Google Ads
- Instagram Business
- Facebook Page
- Google Analytics 4
- Google Search Console
- Google Business Profile
- Phonetrack
- HubSpot CRM

[1] **Meta Ads**: Conversions use the ad account's attribution window (7-day click, 1-day view by default); Ads Manager may show another window. Dates follow the ad account's time zone. Figures for the last 72 hours are still being updated by Meta. Reach is fetched as a true period total, so it is not the sum of the daily values.

[2] **Google Ads**: Conversions use the conversion actions' own attribution models and windows, so they can keep rising for up to 30 days. Dates follow the ad account's time zone. Figures for the last 3 days are still being finalised by Google.

[3] **Instagram Business**: Dates follow UTC as the Instagram API reports them. Insights for the last 48 hours can still change. Reach and profile views are period totals, not sums of daily values.

[4] **Facebook Page**: Dates follow the Page's time zone. Insights for the last 48 hours can still change. Reach is a period total, not a sum of daily values.

[5] **Google Analytics 4**: Conversions and channels follow the property's attribution model (data-driven by default). Dates follow the GA4 property's time zone. Data for the last 24 to 48 hours is still being processed. Google may apply sampling or thresholding to small segments, so detailed breakdowns can differ from the totals.

[6] **Google Search Console**: Dates follow Pacific time as Search Console reports them. Search Console data arrives 2 to 3 days late, so the last days of a period are usually incomplete. Rare queries are anonymised by Google and left out of the query table.

[7] **Google Business Profile**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[8] **Phonetrack**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[9] **HubSpot CRM**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions. Data fetched 19/10/2026.

Summary for Olive Clinic

2026-09-01 → 2026-09-30, compared with 2026-08-01 → 2026-08-31. 28 of 53 tracked metrics moved by 5% or more.

What improved

- **Instagram Business – Posts published:** 5 (+25.0% vs 4)
- **Google Search Console – Impressions:** 174,963 (+15.0% vs 152,158)
- **Google Search Console – Clicks:** 5,889 (+13.9% vs 5,169)
- **Phonetrack – Missed calls:** 63 (-13.7% vs 73)

Needs attention

- **Google Analytics 4 – Purchase revenue:** €10,325 (-18.2% vs €12,618)
- **HubSpot CRM – Deals won:** 44 (-17.0% vs 53)
- **HubSpot CRM – Won value:** €89,946 (-16.0% vs €107,075)
- **Google Ads – Total impressions:** 467,089 (-13.2% vs 538,080)

Efficiency: spend moved -6.0% while conversions moved -4.0%. Results are growing faster than investment — there is room to scale.

Suggested next steps

- Investigate the drop in *Google Analytics 4 – Purchase revenue* (-18.2%).
- Double down on what worked: *Instagram Business – Posts published* (+25.0%).
- Set goals for the headline metrics so deviations trigger alerts mid-month.
