SOURCES

- LinkedIn Ads
- LinkedIn Page
- Google Analytics 4
- HubSpot CRM
- Push API (webhook ingest)

[1] **LinkedIn Ads**: Conversions use a 30-day click and 7-day view window by default. Dates follow UTC as the LinkedIn API reports them.

[2] **LinkedIn Page**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[3] **Google Analytics 4**: Conversions and channels follow the property's attribution model (data-driven by default). Dates follow the GA4 property's time zone. Data for the last 24 to 48 hours is still being processed. Google may apply sampling or thresholding to small segments, so detailed breakdowns can differ from the totals.

[4] **HubSpot CRM**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[5] **Push API (webhook ingest)**: Dates are the ones each pushed row carried. Rows pushed with the same date are summed.

Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions. Data fetched 21/10/2026.
