Performance analysis

01/09/2026 **Sep 2026** 30/09/2026

dashed line: the comparison period

SOURCES

- Meta Ads
- Instagram Business
- TikTok
- Shopify
- Klaviyo
- Google Analytics 4

[1] **Meta Ads**: Conversions use the ad account's attribution window (7-day click, 1-day view by default); Ads Manager may show another window. Dates follow the ad account's time zone. Figures for the last 72 hours are still being updated by Meta. Reach is fetched as a true period total, so it is not the sum of the daily values.

[2] **Instagram Business**: Dates follow UTC as the Instagram API reports them. Insights for the last 48 hours can still change. Reach and profile views are period totals, not sums of daily values.

[3] **TikTok**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[4] **Shopify**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[5] **Klaviyo**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[6] **Google Analytics 4**: Conversions and channels follow the property's attribution model (data-driven by default). Dates follow the GA4 property's time zone. Data for the last 24 to 48 hours is still being processed. Google may apply sampling or thresholding to small segments, so detailed breakdowns can differ from the totals.

Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions. Data fetched 21/10/2026.

Summary for Peak Fitness

2026-09-01 → 2026-09-30, compared with 2026-08-02 → 2026-08-31. 23 of 35 tracked metrics moved by 5% or more.

What improved

- **Instagram Business – Posts published:** 35 (+29.6% vs 27)
- **Klaviyo – Attributed revenue:** £14,583 (+26.0% vs £11,577)
- **Klaviyo – Click rate:** 5.04% (+16.9% vs 4.31%)
- **Instagram Business – Net follower growth:** 3,739 (+16.5% vs 3,210)

Needs attention

- **Google Analytics 4 – Purchase revenue:** £9,278 (-24.3% vs £12,259)
- **Google Analytics 4 – Sessions:** 21,536 (-14.4% vs 25,150)
- **Google Analytics 4 – Active users:** 16,877 (-13.4% vs 19,491)
- **TikTok – Posts published:** 26 (-13.3% vs 30)

Efficiency: spend moved +10.7% while conversions moved +7.0%. Investment is growing faster than results: review targeting, creatives and landing pages before scaling.

Suggested next steps

- Investigate the drop in *Google Analytics 4 – Purchase revenue* (-24.3%).
- Double down on what worked: *Instagram Business – Posts published* (+29.6%).
- Set goals for the headline metrics so deviations trigger alerts mid-month.
