Performance analysis

01/09/2026 **Sep 2026** 30/09/2026

dashed line: the comparison period

SOURCES

- Meta Ads
- Instagram Business
- Google Analytics 4
- Google Search Console
- YouTube
- TikTok Ads
- TikTok

[1] **Meta Ads**: Conversions use the ad account's attribution window (7-day click, 1-day view by default); Ads Manager may show another window. Dates follow the ad account's time zone. Figures for the last 72 hours are still being updated by Meta. Reach is fetched as a true period total, so it is not the sum of the daily values.

[2] **Instagram Business**: Dates follow UTC as the Instagram API reports them. Insights for the last 48 hours can still change. Reach and profile views are period totals, not sums of daily values.

[3] **Google Analytics 4**: Conversions and channels follow the property's attribution model (data-driven by default). Dates follow the GA4 property's time zone. Data for the last 24 to 48 hours is still being processed. Google may apply sampling or thresholding to small segments, so detailed breakdowns can differ from the totals.

[4] **Google Search Console**: Dates follow Pacific time as Search Console reports them. Search Console data arrives 2 to 3 days late, so the last days of a period are usually incomplete. Rare queries are anonymised by Google and left out of the query table.

[5] **YouTube**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

[6] **TikTok Ads**: Conversions follow the account's attribution window (7-day click, 1-day view by default). Dates follow the ad account's time zone. Figures for the last 48 hours can still change.

[7] **TikTok**: Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions.

Numbers come from each platform's API at generation time and can differ from its interface because of attribution windows, time zones and late conversions. Data fetched 19/10/2026.

Summary for Nordic Villas

2026-09-01 → 2026-09-30, compared with 2026-08-02 → 2026-08-31. 21 of 43 tracked metrics moved by 5% or more.

What improved

- **Google Search Console – Impressions:** 220,819 (+16.4% vs 189,685)
- **Google Search Console – Clicks:** 7,485 (+15.7% vs 6,470)
- **TikTok – Engagement (interactions):** 8,106 (+14.2% vs 7,097)
- **Instagram Business – Net follower growth:** 1,094 (+10.4% vs 991)

Needs attention

- **Meta Ads – Amount spent:** €4,578 (-20.0% vs €5,722)
- **Meta Ads – Conversions:** 336 (-16.8% vs 404)
- **Meta Ads – Total impressions:** 466,722 (-16.3% vs 557,253)
- **Meta Ads – Total reach:** 197,917 (-15.3% vs 233,808)

Efficiency: spend moved -20.0% while conversions moved -16.8%. Results are growing faster than investment — there is room to scale.

Suggested next steps

- Investigate the drop in *Meta Ads – Amount spent* (-20.0%).
- Double down on what worked: *Google Search Console – Impressions* (+16.4%).
- Set goals for the headline metrics so deviations trigger alerts mid-month.
